

Document Remediation Services

Eliminate the challenges of inaccessible web-delivered documents or traditional PDFs. **AudioEye** remediates both static and dynamically generated PDFs to deliver fully accessible documents.

STATIC REMEDIATION

AudioEye Static Document Remediation is a comprehensive solution for legacy documents that cannot be efficiently converted to HTML. Through a balance of automated and manual remediation techniques and testing, AudioEye will deliver fully accessible static PDFs.

DYNAMIC REMEDIATION

AudioEye Dynamic Document Remediation is the ideal solution for high-volume, transactional documents that update information without changing the original structure of the template. AudioEye creates and delivers accessible templates to ensure delivery of fully accessible, personalized, dynamically populated PDF downloads for information such as insurance cards, account statements and tax forms.

DOCUMENT REMEDIATION PROCESS

AudioEye leverages technology, subject matter expertise and a hands-on approach to help clients quickly achieve sustainable digital accessibility in the most efficient and cost-effective manner. Your journey to document accessibility begins and ends with AudioEye.

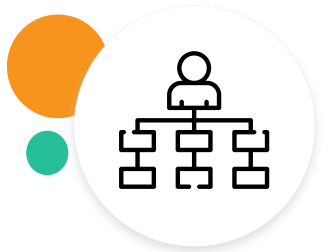

1

AudioEye experts evaluate your PDF's complexity in order to produce a fully accessible document structure and reading order.

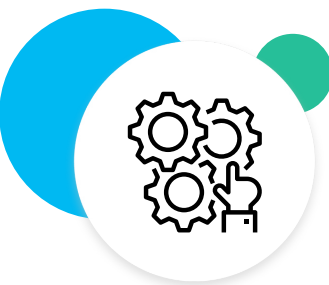

2

AudioEye's team begins remediations, relying on PDF/UA-1 Standards and usability goals as guidance. *PDF/UA is the International Standard for accessible PDF technology*

3

AudioEye's quality assurance testers validate our remediations by utilizing varied assistive technologies (AT) to test different combinations. Each version of a screen reader AT works differently with each version of a browser/Adobe.

4

Once remediated, AudioEye delivers back to you an accessible document. *Delivery timing depends on level of complexity.*
