

How To Select The Right DroneDeploy Plan For Your Drone Program

DroneDeploy's mission is simple: make drone data accessible, consumable, and actionable to everyone, everywhere. Our platform provides you with immediate access to aerial site intelligence in a way that is safer, faster & less costly than any other method of assessment. DroneDeploy offers a complete end-to-end system of record to increase workflow efficiencies as you scale your drone program.

The purpose of this document is to help you understand features so you can pick the right plan for your needs. This means you'll spend less time back and forth comparing features and more time mapping.

	Pro	MOST POPULAR Business	Enterprise
Quick Summary	Launch your drone operations with Pro plan.	Scale your drone program with additional data and export types.	Customize DroneDeploy to fit your drone program requirements with complex workflows and advanced data requirements.
Ideal For	Agriculture users or individual drone pilots testing photogrammetry and 3D modeling.	Teams that require larger maps, 3D models, work with blue prints, and more advanced exports and analytics.	Larger companies that have included drones as part of their strategic vision. Companies with multiple projects, job sites, and customers that require with the most advanced levels of data and accuracy.
User Access Explained	Access analytics tools, and exporting capabilities, as well as email and chat support. Fly small to medium size areas and export maps (JPG only) to make data driven decisions.	Maximize your workflow and operational efficiencies with all Pro Plan features plus deeper analytics, exporting and reporting options. Leverage vector overlays, 3D models, and our App Market to extend and scale your drone program. Add users to your account across multiple locations, teams, and organizations.	Unlocks the most advanced technologies, sophisticated resources, and access to a dedicated success manager with the Enterprise Plan. Generate high quality maps, leverage the highest levels of accuracy and security, enjoy the fastest processing speeds, and most advanced features (GCPs, DTMs, etc). Customize DroneDeploy's platform to fit your organization's needs with access to the co-brand portal, API keys and App Marketplace. Manage multiple teams and projects, with integrations and configurations, SSO, enhanced roles and permissions, and activity audit access.
Annual Price	\$999 per user/year (or \$83 per user/month)	\$3,000 per user/year (or \$250 per user/month)	Contact Us For Pricing Information
Monthly Price	\$129 per user/month	\$399 per user/month	N/A - Annual Only

DroneDeploy Feature List

		MOST POPULAR	
		Pro	Business
Number of users per account	The maximum number of users per login.	1 User Per Account	Primary User Can Add Additional Users
Support	Access help, frequently asked questions, and tips to optimize your drone program.	Email & Chat Support	Email & Chat Support
Dedicated Success Manager	DroneDeploy customer assistance with enablement, adoption, account management, training, product feedback - we will help you succeed. <i>*Available for Enterprise customers only</i>		
Flight	Anytime you plan and fly a drone.	Unlimited	Unlimited
Map & 3D Model Processing	The stitching of aerial images captured during flight to produce high-quality orthomosaic maps and 3D models.	Unlimited	Unlimited
Max 2D Resolution	The level of detail achieved per pixel in your map, which is dependent on the quality of images and altitude of the mission.	Unlimited	Unlimited
Max Image Upload Per Map	The maximum number of images we compress for upload varies by plan.	1,000	3,000
Mobile App	DroneDeploy's app is compatible across Android & iOS devices.	•	•
Mobile App	Customize DroneDeploy to fit your specific needs with access to over 70 apps, including third-party integrations, fleet management, and compliance tools.	•	•
Annotation & Collaboration	Share files and make comments with anyone via link or email.	•	•
Live Map	Real-time drone mapping with your iPhone or iPad (no SD card required) that allows you to generate aerial insights, render maps on-screen and make on-site decisions, during flight.	•	•
Plant Health + Elevation Layers	Measure crop health with RGB and vegetation indexes. Generate elevation maps and adjust thresholds to visualize the digital surface model (DSM).	•	•
Volume, Slope, Surface Measurements	Measure slopes, stockpiles, rooftops and more with volume, slope, surface distance and surface area calculations.	•	•
Basic Crop Health	Measure basic plant reflectivity with RGB imagery to better understand crop health.	•	•
Roof Reports	Accurate and easy-to-use way to inspect and measure roofs. A PDF export of roof geometry DXF file for CAD analysis and design.	Additional Cost. Roof Report app required.	Additional Cost. Roof Report app required.
Map + 3D Export	Available export file types vary by subscription tier.	JPG, Geotiff, OBJ	JPG, Geotiff, OBJ, LAS, XYZ
Digital Terrain Models	Remove buildings, walls, etc from your digital surface model (elevation layer).		Additional Cost - Varies By Report
Ground Control Points	A location processing method that improves aerial map accuracy.		Additional Cost (\$49/map)
Crop Reports	Automated reports of entire field of crops, includes stand count and plant populations. Stand count enables accurate stand establishment, sowing quality, and potential yield loss. Plant populations provides accurate counts in any kind of row, orientation, and angle.		Additional Cost - Varies By Report
RTK Processing	Increase image processing accuracy with RTK drone data.		•
Live Map: Crop Health	Offline crop health analysis to view plant health data without having to leave the field.		•
Advanced Crop Health	Identify plant stress and understand different zones in the field with advanced algorithms (NDVI, ENDVI, VARI), sensor types or by applying zones & grids.		•
Plant Health Shapefile Export	Export your data to any farm software and create management decisions.		•
Shapefile, DXF Export	Export contours as a shapefile, for industry standard such as ArcGIS, or a DXF file for AutoCAD. Export plant health as a shapefile for industry standard agriculture software such as SST or John Deere Operations Center.		•
Overlays	Add a 2D image layer on top of your map. We support vector (PDF or SVGs), PDFs, SVGs, and PNGs.		•
Local Projection Systems	Use ESPG codes (unique identifiers) to export maps into your local coordinate system. <i>*Custom Coordinates available for Enterprise customers only</i>		•
Co-branded Porta	Customize reports by adding your logo on maps, reports, and exports for marketing purposes.		•
Single Sign On*	An authentication process for a user to access multiple applications or resources under one login.		
User Management*	Add users to your account with roles and permissions.		
Roles & Permissions*	Add or edit individual user or group access within your account; control who can fly, map, and share information.		
Data Viewer*	Centralize all data associated with your entire organization in one location.		
Organization Apps*	Automatically add or remove a public or private app from the App Market to everyone in your organization's dashboard.		
Activity Audit View*	Track actions across all users in your organization, or on your project.		
API Access*	Build custom apps and integrations for your organization to connect with DroneDeploy.		
Thermal Live Map*	Real-time drone mapping that detects temperature range variability from your iPhone or iPad as your drone flies (hardware limitations apply) <i>*Available as an add-on feature for Enterprise customers only</i>		

*Included in Enterprise Plans Only
