

DroneDeploy For Any Size Organization

DroneDeploy's mission is simple: make drone data accessible to everyone, everywhere. Our platform provides you with immediate access to aerial site intelligence in a way that is safer, faster, and less costly than any other method of assessment. DroneDeploy offers a complete end-to-end system of record to increase workflow efficiencies as you scale your drone program.

Pick the right plan for your needs; spend less time back and forth comparing features and more time flying drones.

	Pro For Individuals	Business For Individuals	Enterprise For Multi-Users
Ideal For	Individual drone flight and mapping	Individuals that require more advanced flight and processing capabilities	Companies of any size that want to establish and scale their drone program
User Access	Pro Plan helps individuals complete basic flight and mapping through the mobile app (iOS or Android)	Business Plan helps individuals plan complex flights and with advanced processing	Enterprise Solution helps organizations manage multiple teams and projects with integrations, APIs, SSO, advanced reporting, and user management
Support	Email	Email and Chat	Email, Chat, and Phone
Customer Success	n/a	n/a	Adoption Management
Annual Price	\$1,188 per year	\$3,588 per year	Contact Us For Pricing Information
Monthly Price	\$149 per month	\$449 per month	n/a

		Pro	Business	Enterprise
Flight				
Easily create a visual record with automated map, photo, panorama, and video flights				
Flight	Plan and automate flights to capture maps, video, panoramas, and photos	•	•	•
Mobile App	Fly and capture any media manually and automatically through the iOS or Android app	•	•	•
Live Map HD	Real-time drone mapping with your iPhone or iPad (no SD card required) that allows you render maps on-screen	•	•	•
Thermal Live Map	Real-time drone mapping that detects temperature range variability from your iPhone or iPad as your drone flies			•
Cloud Processing and Hosting				
Stitch aerial images captured during flight and produce high-quality orthomosaic maps and 3D models all hosted in the cloud				
Map Engine	Process imagery into high-resolution maps and 3D models with proprietary photogrammetry algorithm	•	•	•
Max Image Upload	The maximum number of images we accept per upload varies by plan	1,000	3,000	•
Ground Control Points	A processing method that improves aerial map accuracy		\$49/map	•
Panorama and Video	Upload and view panoramas and videos from any device		•	•
Local Projection Systems	Use ESPG codes to export maps into your local coordinate system <i>*Custom coordinates available for Enterprise</i>		•	•
RTK Processing	Increase image processing accuracy with RTK drone data		•	•
Radiometric Thermal Processing	See calibrated temperature with Radiometric Thermal Flight map processing			•
Share Links	Share a link to an individual visual asset that can be viewed without logging in to DroneDeploy	Maps and Models	+Panoramas & Design Plans	•
Analysis and Reporting				
View data layers, make measurements and comments from any device				
Annotations and Collaboration	Share maps, measurements, and make comments with anyone via link or email	•	•	•
Measurements	Measure slopes, stockpiles, rooftops, and more with volume, slope, surface distance, elevation, and surface area calculations. Also, manually count objects on any map	•	•	•
Progress Photo Report	Email or share a link to a report showing the latest photos of your project	•	•	•
Roof Reports	Accurate and easy-to-use way to inspect and measure roofs. A PDF export of roof geometry DXF file for CAD analysis and design. *Roof Report app required	\$	\$	\$
Overlays	Add a 2D image layer on top of your map. We support PDFs, SVGs, and PNGs		•	•
Stockpile Report	Automatic report showing total amount and value of stockpiled materials		•	•
Crop Reports	Automate reports of entire field of crops, includes stand count and plant populations. Stand count enables accurate stand establishment, sowing quality, and potential yield loss. *See DroneDeploy App Market		\$	\$
3D Annotations	Take measurements and inventory management in 3D		•	•
Plant Health	Measure crop health indexes and identify plant stress and understand different zones in the field	VARI index for RGB imagery	NDVI indexes for NIR imagery	•
Elevation	View elevation maps and adjust thresholds to visualize elevation differences	Digital Surface Model	+Digital Terrain Model	•
Count AI	Based on machine learning, automatically count trees and cars or train the algorithm to make it your own			•
Side-By-Side	Compare volumes, elevations, maps, and thermal images side-by-side			•
Earthworks	Track progress of earthmoving on your job sites all through DroneDeploy, with Cut/Fill Analysis, Side by Side, and enhanced Overlays			•
Map and 3D Export	Available export file types vary by subscription tier	JPG, Geotiff, OBJ	+LAS, XYZ, SHP, DXF	+RCP
User Management and Workflow Integrations				
Secure data and operations management for your global drone program				
Drone Operations Management	Insight into all of your drone operations across your entire organization in a single platform, automating and centralizing flight, operations, and compliance			•
Roles and Permissions	Add or edit individual user or group access within your account; control who can fly, map, and share information			•
Single Sign On	An authentication process for a user to access multiple applications or resources under one login			•
Premium Integrations	Deep integrations into your valuable tools, such as AutoDesk, Procore, and John Deere			•
API Access	Build custom apps and integrations for your organization to connect with DroneDeploy			•
Activity Audit View	Track actions across all users in your organization or on your project			•
Organization Apps	Automatically add or remove a public or private app from the App Market to everyone in your organization's dashboard			•
