DroneDeploy For Any Size Organization

DroneDeploy's mission is simple: make drone data accessible to everyone, everywhere. Our platform provides you with immediate access to aerial site intelligence in a way that is safer, faster, and less costly than any other method of assessment. DroneDeploy offers a complete end-to-end system of record to increase workflow efficiencies as you scale your drone program.

Pick the right plan for your needs; spend less time back and forth comparing features and more time flying drones.

	Pro Plan For Individuals	Business Plan For Individuals	Enterprise Offerings For Multi-Users
Ideal For	Individual drone flight and mapping	Individuals that require more advanced flight and processing capabilities	Companies of any size that want to establish and scale their drone program
User Access	Pro Plan helps individuals complete basic flight and mapping through the mobile app (iOS or Android)	Business Plan helps individuals plan complex flights with advanced processing options	Enterprise Solutions help organizations manage multiple teams and projects with integrations, APIs, SSO, advanced reporting, compliance tools, and operations management
Support	Email	Email and Chat	Email, Chat, and Phone
Customer Success	n/a	n/a	Adoption Management

DroneDeploy

		Pro Plan	Business Plan	Enterprise Offerings
Flight	Easily create a visual record with automated map, 3D, photo, panorama, and video flights			
Mobile Flight App	Fly and capture any media manually or automatically through the iOS or Android app	•	•	•
Live Map HD	Renders a map real-time on your IOS device, no SD card, uploads, or processing required	RGB	+Plant Health	+Thermal
Cloud Processing and Hosting	Stitch images captured during flight and produce high-quality orthomosaic maps, panoramas, and 3D models all hosted in the cloud			
Map Engine	Process imagery into high-resolution maps & 3D models	•	•	•
Max Image Upload	The maximum number of images accepted per upload	1,000	3,000	•
Ground Control Points	A processing method with known ground coordinates that improves accuracy		$49/map	•
Panorama and Video	Upload and view panoramas and videos		•	•
Local Projection Systems	Use ESPG codes to export maps into your local or custom coordinate systems		Local Systems	+Custom Systems
RTK Processing	Increase image processing accuracy with RTK drone data		•	•
Multispectral Processing	Process datasets from DJI P4 Multispectral or Micasense units		•	•
Radiometric Thermal Processing	Visualize calibrated temperature readings on your thermal maps			$
Analysis and Reporting	View data layers, make measurements and comments from any device			
Annotations and Measurements	Make comments, count objects, and take a variety of measurements including volume, slope, distance, area, and elevation	2D	+3D	•
Overlays	Overlay a 2D layer, such as a design file, on top of your map (PDF, SVG, PNG)		•	•
Stockpile Report	Automated report showing total amount and value of stockpiled materials		•	•
Roof Reports	Accurate measurements and defect detection with automatic roof reports (PDF, DFX)	$	$	$
Stand Count Reports	Automatic plant population and stand count reports for an entire field	$	$	$
Inspections	Evaluate your site in 2D or 3D, tag issues, add a summary, and collaborate with relevant team members		•	•
Side-By-Side	Compare project maps side-by-side to evaluate change over time		•	•
Plant Health	Measure crop health indices, identify plant stress, and visualize different zones in the field	VARI index for RGB imagery	NDVI and Multispectral	•
Elevation	View elevation maps and adjust thresholds to visualize elevation differences	Digital Surface Model	+Digital Terrain Model	•
Count AI	Automatically count trees and cars in a map using machine learning			•
Earthworks	Track progress of earthmoving on your job sites with Cut/Fill Analysis tools			•
Exports	Available file types for map export	JPG, Geotiff, OBJ	+LAS, XYZ, SHP, DXF	•
Sharing Maps	Send map links to external stakeholders or collaborate on maps with paid DroneDeploy users	•	•	•
Premium Integrations	Deep integrations into industry-leaders such as AutoDesk BIM 360, Procore, OneDrive, and Esri			$
API & SDK Access	Build custom apps and integrations to connect DroneDeploy with internal systems and workflows			•
Operations Management	Data and operations management for your drone program			
Drone Operations Management	Centralized dashboard for training, flight logs, and LAANC airspace approval			•
Drone & Pilot Compliance	Automatically check your pilots and drones for up-to-date certification, highlighting any compliance risks			•
Equipment Management	Allow team members to set drone operational status, maintenance, and registration details			•
Roles and Permissions	Add and edit user access within your account to control who can fly, edit, and share			•
Single Sign On	An authentication process for a user to access multiple applications under one login			•
API & SDK Access	Build custom apps and integrations to connect DroneDeploy with internal systems and workflows			•
Activity Audit	Track actions across all users in your organization			•
Organization Apps	Automatically add or remove a public or private app from the App Market for everyone in your organization			•
Professional Services	Ensure program success with custom training, consulting, flight services, and reporting			$

• Included $ Additional Cost
