Find the right audience with UserZoom Recruitment

Get fast, flexible access to over 120 million people worldwide with our state-of-the-art participant recruitment engine.

Find the right audience with UserZoom Recruitment

Conducting a successful UX study is both a science and an art. And like all scientists and artists, UX researchers need the right tools to do their job. You need to set your study's objectives, select the best methodology, create a research plan, and most importantly you need to find the right participants to take part in your research.

Unfortunately finding the right participants is also one of the hardest jobs. Over the past four years, our annual [State of UX survey](#) shows that recruiting participants is one of the biggest challenges for UX researchers.

Research is only as good as the people who take your studies. If you're restricted by a small pool of participants and geographical reach, this can undermine even the most thoroughly planned research projects.

For valuable, reliable insights, you need to recruit the right people, the right sample size, and at the right time.

Of UX practitioners say that participant recruitment is their number one challenge

So, what's a UX researcher to do?

Well, that's where our intelligent participant recruitment platform steps in to save you time and give you access to the high-quality participants you need.

Why choose UserZoom for participant recruitment?

We're the market leader in providing participants for all types of UX research studies. Whatever your sector, we can deliver the right participants at the right time—and at scale.

Of UserZoom studies finish fielding in under 24 hours, giving you the timely insights you need to make informed decisions.

Whether you want to conduct a 1000-person quantitative study or a qualitative study with just a few online interviews—or anything in between—we have the capabilities you need.

Recruit top quality participants faster than ever

Built into the UserZoom platform, our unique participant recruitment engine provides you with instant access to a global network of over 120 million verified research participants, curated from over 40+ panel partners and spanning over 100 countries.

Find the right participants for nearly any target audience even including niche and hard-to-reach audiences.

Harness the power of automation

Streamline the recruitment process with automated participant recruitment. Let the platform automatically find the right participants based on your criteria, send invites, schedule sessions, and distribute incentive payments after the session is complete.

Feel supported every step of the way:

Our recruitment engine is also supported by a team of experienced participant recruitment experts who ensure you are always reaching the right participants.

Whether you target consumers, health care providers, or businesses, the end result is better data to inform your business critical UX decisions.

A Global network of 120+ million research-ready respondents.

Automated access to a network of panel providers for your every need, local expertise, and access to 100+ countries.

“

Here's how we helped this [Fortune 100 Science Solutions](#) manufacturer gather insights from hard-to-reach participants, in their own words.

One of the biggest obstacles we face is that it's hard to find our users, and they're very expensive to recruit because they're professionals, they're busy and they get a ton of emails. Our audience is really tough to find, so when we get a chance to talk to them, we have to make sure we can answer several research questions with one study. That is very important.

One of the ways we've been using UserZoom is to recruit these international professionals. It's been super successful for us. We've been able to launch studies very quickly, as it allows us to narrow who we want to reach.

User Zoom is an essential tool that allows us to efficiently and continuously receive feedback from our visitors.”

”

Healthcare Recruitment

We have access to the following specialties, medical professionals and patient ailments, globally.

HEALTHCARE PROFESSIONALS

Dental Assistant
 Dental Hygienist
 Dentist
 Diabetes Nurse Educators
 Management/Administrators
 Lab Manager/Technician
 Medical Assistant

 Osteoarthritis
 Obesity
 Neurological Conditions
 Narcolepsy
 Muscular Dystrophy
 Migraines

Mental Illness (most types)
 Lupus
 Liver Disease
 Kidney Disease
 Irritable Bowel Syndrome
 Insomnia
 Hypothyroidism

HIV
 High Blood Pressure
 High Cholesterol
 Hepatitis
 Hemophilia
 Heart Disease
 Hashimoto's Disease

Built with security in mind

Real, genuine users at your fingertips

We understand the importance of reliable data. So, we've partnered with Imperium RelevantID, a leader in anti-fraud solutions, to block bots and fraudulent behaviour. RelevantID also uses digital fingerprinting to help us identify duplicate accounts.

As an additional layer of security, panelists must also link their profiles with a verified PayPal account. This helps us verify the panelist's country and further identify and remove any duplicate accounts.

FROM RECRUITMENT TO RESULTS, WE PROTECT DATA INTEGRITY

60-day quarantine period

UserZoom's participants enter a 60-day quarantine period after completing a study. This prevents you from seeing the same data from repeat participants, and also helps prevent participant fatigue. On average, our participants only complete 7-8 studies per year.

Think Out Loud certified

All panellists who participate in Think Out Loud studies must first complete a reviewed practice study. If they pass, they are certified and able to participate in future studies.'

Incentives without bias

We offer incentives based on Fair Market Value to ensure healthy responses without introducing incentive-caused bias.

Regularly refreshed panel

Our panel is refreshed regularly, and we have randomization and sampling rules to discourage sneaky professional testers.

Cherry-picking discouraged

Our invitations are standardized to discourage participants from cherry-picking studies.

We implement speeder and straight-liner traps, directly within the study—those who fail the quality metrics are automatically removed and replaced.

These panelists are then flagged and monitored within our panel. Any repeat offenders will be banned from participating in future studies. As a result, our exclusion rates are between 7-8%, lower than the industry standard.

Just like you, we take data privacy seriously

We're crystal clear about the data we record, and how we use it.
