

## VENA® FUEL CELLS

The perfect solution for all the fuel cell lines

### Vena® Fuel Cells

Venair's R&D department presents a new material, an elastomer composite especially designed for the use in Fuel Cells. This material has been designed to fulfill the main requirements in Fuel Cell applications and contribute to the overall efficiency of these systems.

The use of high purity and quality in raw materials in Vena® Fuel Cell ensure the ultra-low content of leachable substances and component inertness in Fuel Cell ambient.

### Features

- Good mechanical properties.
- Low permeability.
- Heat stability up to 130°C with peaks up to 150°C
- Excellent purity - extremely low extractables and volatile compounds content.
- Imparts almost no conductivity to contact fluids.
- Excellent chemical resistance
